(4) Cuba situation.

(5) Korea situation.

e. Individual capabilities.

f. Future objectives.

4. (S) COMMENTS:

a. Overall, I thought the team was attentive to the presentation. However, in my opinion, at least 2/3 members were very negative in their comments in that they really didn't listen to the briefing and their questions so indicated that.

b. The feeling I received was that my word was no longer valid since they had classified me as a "believer" - whatever that means - and, therefore, I could not be objective about the program.

c. I feel, very strongly, that just the opposite is true. That is, that some members of the team don't want to believe that psychic behavior exists and refuse to really listen to any presentation on the subject matter. They find it very convenient to put "labels" on people and summarily dismiss them without fully discussing the situation.
